## [Outdoor LED Display \(Rental\)](#)

Welcome to product webpage of Desay Company! As a professional outdoor LED display manufacturer, we design and produce the waterproof and dustproof LED display in strict accordance with IP65 standards. The CE certified outdoor LED display is typically used in hospitals, banks, stadiums, and also advertising, securities, railway, road, civil aviation, real estate, power, and entertainment industries. Additionally, we offer customers the best rental solutions for their needs.

Made of superior materials, Desay rental panel comes with creative mechanical design, and offers integrated solution to rental use in concerts, sports events, TV shows, fashion shows, outdoor exhibitions and conventions. The rental LED video screen is specially designed to ensure high mobility of the panel and stability of structure for frequent assembling and dismantling. Developed by use of sophisticated LED display technology, Desay rental LED screen is increasingly popular in North America, Europe, South America, Asia, and Middle East, etc.

### **Advantages**

1. Our outdoor LED display is produced using SMD 3 in 1 technology to achieve super wide viewing angle and even panel surface.
2. The rental LED display makes use of high brightness SMD for outdoor solution, offering brightness of 5,500 cd/m<sup>2</sup>.
3. The LED screen provides reliable performance, with high contrast ratio and high refresh rate.
4. Through the use of calibration technology, the LED panel offers consistent color and brightness. The calibration technology makes the use of rental LED display more widespread.
5. The outdoor LED display comes with mechanical structure that is easy for rigging, thus saving time for assembling and dismantling.
6. There is no connecting wire between panels. The unique patented design of the panel makes inching adjustment possible.
7. The outdoor LED display is thin, lightweight, and thus convenient for assembling and dismantling.
8. With handles on both sides, the LED panel makes assembling work much easier.
9. A variety of input signals are acceptable, such as HDTV, S Video, NTSC/PAL, DVI, VGA, SDI and HD-SDI, etc. High-definition video processor is available for signal transition.
10. The outdoor LED screen comes with a protection controller box, and is thus safe during transportation.
11. The outdoor LED display is designed with a special power distribution unit to facilitate power supply for rental use anywhere.

We also provide a vast array of LED lighting fixtures, including LED spotlight, street LED light, LED downlight, and more, in addition to the rental LED display. These products are eco-friendly, energy efficient, and have long life and high luminous efficiency. If you are interested in the LED products, please click related webpage for more detailed information, or contact us directly. The staff at Desay is ready and waiting to help you.
